

Lighting Design

SERVICES AVAILABLE

PT by PT CALCULATIONS

Verify that all lighting levels have been obtained.

ARCHITECTURAL LIGHTING DESIGN

Coordination with the architect to insure that the lighting compliments the architecture of the space.

RENDERINGS

Allows the client to get an idea of what the finished Space would look like during the design phase.

CONTROLS

Specify and program the controls of the lighting. This covers automatic controls, time clock events, LED color changing, and various settings in a space.

JOBSITE REVIEWS

We verify that the lighting has been properly installed, located and aimed.

COST ANALYSIS / SUSTAINABLE DESIGN

Our goal is to provide the client with the most energy efficient system with the lowest maintenance cost possible.

Get ready to raise your expectations:

At HP Engineering Inc. we are one of the few MEP firms in the region that does ALL of their lighting design in house. We feel this strategy gives the architect and owner the best value for their project. As a team we have over 20 years of experience in lighting design and we provide the following services: pt by pt calculations, architectural lighting design, renderings, control specification and programming, jobsite reviews for : proper installation, location and aiming, cost analysis and sustainable design services. We feel lighting is a very important part of every project and work with the design team to create the best lighting solutions possible.
