HP Engineering is a full service mechanical, electrical, and plumbing design firm. We are licensed in over 40 states and our project experience covers a wide range of size and complexity. At HP Engineering we take great pride in the work we provide to our clients. We are well versed in both Auto-Cad and REVIT drawing platforms. We have experience working on LEED projects and currently have two LEED Accredited Professionals on staff to assist with design or consulting. We offer many additional specialized services: commissioning, daylight modeling, lighting design, energy modeling, AV design, etc...

Our firm is built upon the foundations of accountability and integrity.
