- Our new office location is: 1836 South Baltimore Avenue Tulsa, OK 74119. Our phone number is (539)664-4618. Stop by and see us...
- Erin Adkins, Energy Division Manager, has recently been certified as a LEED Green Associate. She will sit for her LEED Existing Building Operations & Maintenance certification later this year, as well as her CMCP exam.

Normally this space is dedicated to a project we've recently completed, but this month we wanted to share with you our latest news. HP Engineering has recently opened a new office in Tulsa, OK. We are very excited about the opportunity to serve more

clients and being involved with a new community. Brandon Pinkerton, Vice President, will be running the Tulsa office and we are working now to develop a team of quality individuals who think the way we do. Our firm started in the fall of 2007 with two men who wanted to do things a little differently...provide quality drawings, quality service and work within a team approach....**Simplify MEP.** Our goal at HP Engineering

Inc. is to meet the needs of our clients and exceed their expectations. We take this goal very seriously and

we continue to evaluate what it means and how we can improve upon it. We strive to provide quality design, proactive solutions and jobsite overview and coordination. We're not trying to reinvent the wheel, but deliver on what we promise and go the extra mile to insure the client is happy with the end result. Get ready to raise your expectations for what a MEP firm can do for you...

This section will provide useful information and sometimes it will be just for fun...

Facts, Info, etc...

**AIA:** We believe in supporting local organizations, especially those that contribute to our industry in a positive way. We are proud to say that we are sponsors of AIA Arkansas & AIA Eastern

Oklahoma. We also provide CEU classes for AIA members.

**REALgreen Conference & Expo:** If you are interested in finding out more about sustainability in the real world, plan on attending this upcoming conference and expo. It will be in Rogers, AR. From May 19-22. CEU credits will be available for AIA and USGBC members. Go to [www.real-green.info](http://www.real-green.info) for more information

**Some random facts:** Raindrops fall at a rate of 19 miles per hour.

By recycling a three foot stack of newspapers, you can save a tree.

The can opener was invented 48 years after the can.

An iceberg contains more heat than a lit match.
